MEMORANDUM FOR:

SUBJECT : Attache Functioning During Cyprus Crisis

1. I have been told that the effective manner in which the Defense Attache Staff on Cyprus kept Washington advised of developments during the onset of the recent crisis represents a good example of the value of attache reporting. I understand that something like 100 reports were forwarded during a rather brief span of time.

2. The DCI in his meeting last week with PFIAB had in his briefing book a DIA report on recent attache accomplishments. If we can pull together a very brief talking paper, one or two pages in length, for the DCI's NSCIC briefing book, he probably could use it to advantage. A NSCIC meeting is tentatively planned for 15 or 16 August.

3. Could you give me a talking paper on attache performance in the Cyprus crisis by Friday, 9 August?
